

LTES - Bug #28

WRITE_WORD command is "rejected" but actually still executes

06/22/2019 07:31 AM - Greg Mathis

Status:	Closed	Start date:	06/22/2019
Priority:	Normal	Due date:	
Assignee:	Jennifer Lazbin	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description As an example, writing 0-3 to 0xA1000018, will set the boot image select. This command works, Image Boot Select in telemetry gets updated as expected. However the Cmd Reject Counter in telemetry also increments. This also seems to happen with the WRITE_STREAM command.			

History

#1 - 06/24/2019 01:31 PM - Greg Mathis

- Project changed from EMIRS to LTES

#2 - 06/25/2019 08:52 AM - Greg Mathis

Yes, using the WRITE_STREAM command to select the boot image, will also successfully execute, yet increment the command reject counter.

#3 - 06/25/2019 08:52 AM - Greg Mathis

- File wordStreamCommand.JPG added

- File wordWriteCommand.JPG added

#4 - 06/28/2019 07:53 AM - Greg Mathis

- Status changed from New to Closed

Fixed with FPGA version 3.11
